Isomux Commercial License Agreement

Sample terms, draft 8, November 2026

> Sample for a first look and comments. It is not an offer and is not binding. Isomux LLC's counsel has not reviewed it yet; the license grant and the HIPAA section will change after that review.

Order summary

Provider	Isomux LLC, an Oregon limited liability company ("Isomux")
Customer	[Customer legal name] ("Customer")
Seats	[N] seats, minimum 10; seats can be reassigned at any time (section 3)
Price	$25 per seat per month, billed monthly; or $240 per seat per year ($20 per month), billed yearly. The same price at any number of seats.
Billing period	[Monthly / Yearly]
Free trial	The first month after the Start date, for any number of people
Start date	[date]
Customer contacts	Business: [name, email]. Billing: [name, email]. Technical: [name, email].
Support	24/7: llc@isomux.com. Isomux contact for critical issues: [name, phone].

1. What Customer gets

Isomux is self-hosted software that gives a company's staff AI agents. People work with their agents in a web app in the browser, where agents sit in shared rooms of a visual office. Under this agreement Customer gets:

- a commercial license to run Isomux (section 2);
- every Isomux release published during the term;
- setup help, support around the clock, and included hours of Isomux engineering time (sections 7 and 8);
- the Isomux sizing guide, which helps Customer choose its servers. The guide is information, not part of these terms.

2. License

Isomux is published under the Business Source License 1.1, which allows free production use only by organizations of up to 10 people. While this agreement is in effect and fees are paid, Isomux grants Customer a non-exclusive, non-transferable license to install and run Isomux in production for Customer's own internal

business, on infrastructure that Customer controls (its own cloud accounts or hardware), in any number of installations ("offices"). The license covers the free trial too.

Customer may not sell, sublicense or host Isomux as a service for third parties, and may not remove Isomux's license or copyright notices. Everything not granted here stays with Isomux.

3. Seats

A seat is one member of an Isomux office. Each seat includes unlimited agents and devices. The seats cover all of Customer's offices together.

Customer's IT manages the seats in an enterprise account on Isomux's website: the number of seats [N], and the offices that use them. Each office connects to that account with the account's secret, and takes a seat from the account when it adds a member and gives it back when it removes one. Seats can be reassigned at any time, at no cost: when an employee leaves, an office owner removes them and invites the replacement. Adding or removing members never changes the bill: Isomux bills [N], the number of seats in the account (section 4).

An office never locks out a member who already has access. If an office cannot reach Isomux, it still adds members and settles the count when it reconnects.

4. Fees and invoices

- Customer's IT can raise or lower [N] in the enterprise account at any time, to no fewer than 10 seats. The first invoice comes at the end of the free trial.
- Monthly plan: one invoice at the end of each month, for the highest [N] during that month, at $25 per seat.
- Yearly plan: one invoice at the start of each contract year, for [N] seats at $240 per seat. At the end of each quarter in which [N] went up, one invoice bills each added seat from the month it was added to the end of the contract year, at $20 per seat per month. [N] can go down only at the renewal; there are no credits during the year.
- Invoices are due within 30 days. Prices are in US dollars and do not include taxes. Customer pays applicable sales and similar taxes, other than taxes on Isomux's income.
- Isomux may change the price at a renewal with 60 days' written notice. A yearly price stays fixed for that year.

5. Late payment and billing disputes

An amount not paid when due carries a late fee of 1.5% per month (or the highest rate the law allows, if lower), from the due date until paid. An amount Customer disputes in good faith under the steps below carries no late fee while the dispute is open. Isomux may waive a late fee.

1. If Customer thinks an invoice is wrong, Customer emails llc@isomux.com within 30 days of the invoice, with a subject that starts with "Billing dispute:", saying which amount and why.

2. Customer pays the part it does not dispute by the due date.
3. Within 10 business days, the billing contacts compare records. For seats, the record is the enterprise account (section 3).
4. If they do not agree within 30 days, the business contact of each party and an executive of Isomux settle it in a call.
5. If that fails, the parties go to non-binding mediation with JAMS (a US mediation and arbitration provider, jamsadr.com), by video, and share its cost equally. If mediation does not settle it within 60 days, either party may go to court.
6. The result goes on the next invoice, as a credit or a charge. A disputed amount that turns out to be owed is due 10 days after the result, and the late fee applies after that.

6. Customer's costs and responsibilities

Customer runs Isomux on its own infrastructure and pays for it. Model usage (for example Amazon Bedrock, or another provider Customer chooses) is billed to Customer's own account, not by Isomux. Customer decides who gets access and which tools, data and integrations its agents may use, and is responsible for its users' use of Isomux.

7. Support

How to reach Isomux. Email llc@isomux.com, 24 hours a day, 7 days a week. Isomux's support agent, an AI agent, answers first: it collects the facts, solves what it can, and pages an Isomux engineer when a person is needed. For a critical issue, Customer can also call the Isomux contact in the order summary.

Critical: a defect in Isomux makes it unusable for everyone, exposes Customer data, or is a critical security issue	First response: within 15 minutes, 24/7 (5-minute target). An Isomux engineer works on it: within 1 hour, 24/7. Status update: at least every hour until it is resolved (section 7, Status updates). Target: a workaround within 2 hours; a fixed release within days.
Everything else: questions, bugs, requests	First response: within 1 hour, 24/7. An Isomux engineer replies: within 4 business hours.

Business hours are Monday to Friday, 8am to 6pm US Central time, except US federal holidays. Response times run from Customer's email. Customer sets the severity in the email; Isomux may change it with a reason.

Status updates. For a critical issue, Isomux posts a written update at least every hour, day and night, until the issue is resolved: what Isomux found, what it is doing now, and its current estimate of when the issue will be resolved. Updates go to a status page for the issue that Customer can check at any time, and to the Customer contacts by email. On request, Isomux also gives updates by phone.

Security. Customer reports a security issue to the same address. Isomux tells Customer about any critical or high-severity issue in Isomux it learns of, with a workaround when one exists. Until the fix is released, Isomux gives status updates as for a critical issue. Customer chooses when to install a release.

8. Isomux engineering time included

- Setup help in the first 60 days: installation on Customer's infrastructure, company sign-in, and building the first agents with Customer's team.
- After that, each month: how-to help, configuration and custom work. Unused hours do not carry over.

Seats	Setup help	Each month
Up to 49	10 hours	2 hours
50 or more	20 hours	4 hours

- Time spent on a bug or an outage caused by Isomux never counts against these hours.
- More time: $250 per hour.

9. Data, privacy and HIPAA

Isomux runs entirely on Customer's infrastructure. Isomux LLC has no access to Customer's systems or data, including protected health information. An office sends Isomux only the office's identity and its number of members, for seat counting, and asks GitHub whether a new release exists. Support uses only what Customer chooses to share, which should not include protected health information. For hands-on support with access to Customer's systems (for example a screen share), the parties first sign a Business Associate Agreement.

10. Confidentiality

Each party keeps the other's non-public information confidential, uses it only for this agreement, and protects it with reasonable care. This does not cover information that is public, already known to the recipient, received lawfully from someone else, or that the law requires to be disclosed.

11. Warranties and liability

Isomux warrants that it has the right to grant the license in section 2; otherwise Isomux is provided "as is", without other warranties, express or implied. AI agents can make mistakes, and Customer is responsible for how it uses their work. Each party's total liability is limited to the fees paid in the 12 months before the claim, and neither party is liable for indirect or consequential damages, lost profits or lost data. These limits do not apply to a breach of confidentiality or to Customer's payment obligations.

12. Term and ending

A monthly agreement renews each month, and either party may end it at the end of a paid month. A yearly agreement renews each year unless either party gives notice 30 days before renewal. Customer may end it during the free trial at no cost. Either party may end it for a material breach not fixed within 30 days of notice. When it ends, the commercial license ends, and Customer may use Isomux only as the Business Source License allows.

13. General

Oregon law governs this agreement. Isomux may use Customer's feedback freely. Neither party may assign it without the other's consent, except to a successor of its business. This agreement, with any signed BAA, is the whole agreement on its subject; changes must be in writing and signed by both parties.
